## *Case Study – Finesse Tissue*

<b>System Size:</b>	<b>98.2kW</b>
<b>Panel Brand:</b>	Changzhou Trina Solar Energy
<b>Panel Model</b>	TSM-260PC05A
<b>Panel Quantity</b>	375
<b>Inverter Brand:</b>	ABB
<b>Inverter Model:</b>	3 X TRIO 27.0 – TL - OUTD
<b>Solar Annual Production:</b>	144,832kWh

Finesse Tissue is a leading paper/tissue manufacturer in Sydney – Fairfield area. They have in house manufacturing services and operate 6 days in a week. Due to their heavy machinery use, their electricity consumption was very high. They implemented solar to cut down and reduce their electricity consumption.

They used our finance offering which made their system cash flow positive from day 1. The whole installation process took 1.5 weeks. The complete job was project managed by RK Solar & its technicians.
